My father is looking for a DOS program called "SuperMorse", or at least
that's what he thinks the name is. It's supposed to help you study the
morse code, generate test for the different license classes, etc.

Does anyone know where I can pull this off the internet, or where it can be purchased, if it indeed does exist. thanks

>fire. <G>

>Then again I live in San Jose, and getting to Aptos would take a good
>hour, which means I'd have to leave the house by atleast by 5:30am.

>Try hitting up the locals instead..Seeing the number of posts that you've
>made I doubt you've had much success here. Time to hit 10 meter and get
>the radio addicts. Or if your really desparate get a bunch of cbers
>instead.

Was that last comment really needed? I really think that labeling a whole
group of band users is particularly irresponsible. Next time someone moans
about "Ham" activities and how they "always" have 200ft towers, and "always"
wipe out anyones chances of getting any form of TV signal. Please remember
your own bout of generalisation...

Maybe a cross-post onto rec.radio.cb might be a good idea?
Maybe thinking before typing may help???

For the record. I have ALWAYS found CB'ers treating the bands with respect.
That is more than you gave them wasn't it?
